

## Bulletin of the American Mathematical Society Volume 17

Filesize: 5.44 MB

### ***Reviews***

*This is actually the best ebook we have read till now. Indeed, it can be enjoy, nevertheless an interesting and amazing literature. You will not feel monotony at whenever you want of the time (that's what catalogs are for regarding should you question me).*

*(Jamar Stracke)*

**BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY VOLUME 17****DOWNLOAD**

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 194 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . point except P there passes one other integral curve, and it is tangent to T; while an infinite number of integral curves may pass through P no one of which is tangent to T. Or T may be a cusp locus, so that through every point except P there passes one integral curve, and it has a cusp at this point; while an infinite number of integral curves may pass through P no one of which has a cusp at P. In this case it may happen also that for any point except P the integral curve is not tangent to T, while at P every one of an infinite number is tangent to P. 6. Klein has considered the problem of determining the two parameters of the differential equation of  $L_a$  in 6 in such a manner that the equation furnishes two solutions, one of which vanishes at the end points of a certain interval  $O_j$ , and oscillates  $m$  times within the interval, and the other vanishes at the end points of a second interval  $a_j$  and oscillates  $n$  times in the interval,  $m$  and  $n$  being positive integers or zero arbitrarily prescribed. Other special problems of a special nature which involve two or more parameters have been treated by Klein and Bocher. For the case of two parameters these may be considered as special cases of the following: If  $p$ ,  $q$ ,  $r$ ,  $s$ ,  $t$ ,  $u$ ,  $v$ ,  $w$ ,  $x$ ,  $y$ ,  $z$ ,  $1, 2, 3, \dots$
