COASTAL HAZARDS

Springer. Hardcover. Book Condition: New. Hardcover. 840 pages. Dimensions: 9.3in. x 6.5in. x 1.6in. This book covers the gamut of coastal hazards that result from short-term low-frequency events and have high-magnitude and far-reaching impacts on coastal zones the world over. Much of the world's population now lives in low-lying coastal zones that are inherently vulnerable to natural hazards such as flooding from hurricanes, tropical storms and northeastern storm surges; shoreline (beach and dune) erosion; cliff and bluff failures; and saltwater intrusion...

Reviews

Complete manual! Its such a great study. We have read through and so i am confident that i am going to go through once again once more down the road. It is extremely difficult to leave it before concluding, once you begin to read the book.
