Not illustrated. 1917 Excerpt: .ordinate y , then the danger zone of the larger animal would extend from M to y . In the first case the danger zone of the antelope is discontinuous, in the second case the danger zone of the animal is continuous. For hunting purposes the danger zone of the animal hunted should be continuous. It is clear then, that the range MO must be less than 500 yds. if the danger zone of the antelope shall extend from M to O. The point blank range, so called, because the bullet was formerly supposed to travel in a straight line for a short distance, is a misnomer. Technically speaking, it implies a condition that cannot exist; but since the term is in common usage, we shall continue its use, but with the restrictions in the definition as given. The point blank range is that range within...
